Station Alert/Alarm

Query and response:

I would like to know the following:

Do all stations across Dorset and Wiltshire use the same alarm on station?

No

If not, why?

We do not currently run a standard product across our Service. The current installs are based on individual station requirements and arrangements that were set up prior to the recent combination of Dorset Fire & Rescue Service and Wiltshire Fire & Rescue Service. Sounders and bells are replaced as and when required.

Do any appliances across the service have an MDT that sounds an alarm when a callout is sent through via Control?

Yes

If so, could you attach a copy of the sound of the alarm?

The sounds used are built into the software. Recordings of these sounds are not held.

Do any stations across Dorset and Wiltshire use tannoys on stations to read out callsigns of appliances?

No

If so, could you provide a copy of these sounds?

Not applicable

Could you attach a copy of the sounds / tones of the alert(s) for wholetime stations?

The sirens/klaxons used are industry standard and dependant on the product installed. Recordings of the sirens/klaxons are not held.

Information/Detail accurate on the date provided: 09, December 2022
